Course Description:

- A 2.5 day seminar / workshop
- Basic practical instruction and experience of techniques of bladder function investigation
- Each registrant will observe 3 actual patient investigations

Course objective:

At the conclusion of the course, participants will be able to run a basic urodynamics examination of high quality including:

- Set up and calibration of urodynamics equipment
- Recognition and correction of artefacts in urodynamics investigations
- Understanding of urinary tract dysfunction and how it is demonstrated by urodynamics study
- Recognition of abnormalities of bladder emptying, including urethral obstruction.
- Interpretation of the study adequate to conduct it appropriately and independently
